About the Museum of Classical Archaeology:

The Museum of Classical Archaeology is one of the few surviving collections of plaster casts of Greek and Roman sculpture in the world. The collection of about four hundred and fifty casts is open to the public and housed in a purpose-built Cast Gallery on the first floor of the Classics Faculty. Rather than simply being a collection of copies, the real beauty of having all these pieces together under one roof is that the visitor can compare and contrast objects which he or she could never view together in the original.

About the University of Cambridge Museums (UCM):

University of Cambridge Museums is a consortium of the eight University Museums, which works in partnership with the Cambridge University Botanic Garden and other Cambridge University collections. The University's collections are a world-class resource for researchers, students and members of the public representing the country's highest concentration of internationally important collections, all within walking distance of the City Centre.
